RG104 E-1 Box 124 June-Sept 1881

P

Treasury Department,

OFFICE OF THE DIRECTOR OF THE MINT,

Washington, D. C. May 3 1881.

A. London Snowden,

Supt. U. S. Mint,

Philadelphia, Pa.

Sir:-

Referring to your letter of the 16th ultimo in relation to lighting your Mint by electricity and submitting the terms upon which the United States Electric Company offer to introduce the Maxim incandescent lamps, I have to state that from the statements furnished by you of the cost of lighting by gas and electricity, it would appear that the latter is the cheapest,

RG104 E-1 Box 124 June-Sept 1881

but as the cost of the necessary electric apparatus is large, I think it advisable that before adopting any system of electric lights we should be careful to ascertain that the same would prove satisfactory. If after a thorough examination you are satisfied that the Maxim incandescent lamp will prove entirely satisfactory, you are authorized to make the necessary arrangements for the introduction of the same after the 1st of July next, the cost thereof to be paid from your appropriation for contingent expenses, 1882. I would suggest that instead of taking the apparatus after 30 day's trial that it be after

RG104 E-1 Box 124 June-Sept 1881

a trial of 60 or 90 days.

Very respectfully,

Horatio C. Burchard

Director.
